PROFESSIONAL SUMMARY

Design engineer who builds what I design. Five years creating AI-powered products, from enterprise conversational systems to independently shipped iOS and Android apps. I connect interaction design, product strategy, and engineering—using user research, real-world data, and rigorous evaluation to turn complex problems into working products.

PROFESSIONAL EXPERIENCE

Lead AI Interactions Engineer | NiCE Apr 2026–Present · Full-time

- Identified a gap in how consultants practice between client engagements; designed and built a pixel-game project simulator for the team, targeting a November 2026 launch with manager approval.
- Built a Cognigy implementation auditor for a 10-person team, using deterministic checks against documented best practices rather than less predictable LLM evaluation.
- Test and provide structured feedback on an internal Claude plugin that enables stakeholders to build and test Cognigy flows, helping align its next version with implementation standards.
- Lead enterprise agentic AI implementations for strategic customers from technical discovery through production, including conversation design workshops.

Founder, Product Designer & Engineer | Mesquite & Thorn Digital, LLC May 2026–Present · Part-time

- Designed, engineered, and launched Handsful for iOS and Android, with simultaneous multi-baby logging, comparison views, shared caregiver access, and English/Spanish localization.
- Designed and launched School Supplied for iOS, using OCR and LLM parsing to consolidate photographed school supply lists into a single shopping list.
- Own product research, usability testing, iteration, and full-stack development (Expo, TypeScript, NativeWind, Firebase, EAS); built a companion Astro/Vercel marketing site.

Product Designer, Conversational UX/VUI | Lowe's Feb 2023–Feb 2026 · Full-time

- Transformed product-inquiry IVR with LLM-powered conversational and prompt design, increasing containment from 15% to 43% and saving approximately 123,000 labor hours annually.
- Used transcript analysis, usability testing, and business data to prioritize improvements; batch-tested multi-step LLM functions for logic failures and unreliable outputs.
- Designed agentic capabilities for a legacy-to-generative IVR transition, including a voice-enabled associate call-out experience that saved thousands of labor hours monthly; improved customer-to-agent summarization to reduce associate cognitive load.
- Designed a conversational lead form that contributed to installation conversion growth.
- Led the design team for 10 weeks during a planned leave, coordinating priorities and stakeholders and delivering prototypes, conversational architecture, and handoff documentation.

EARLIER EXPERIENCE

UX Designer, Conversation Design | Allstate via Aquent Jul 2022–Feb 2023 · Contract

- Analyzed chatbot transcripts and usability findings to identify misrouted intents; redesigned flows and tuned NLU to improve containment and intent resolution.

Jr Conversation Designer → Conversation Designer | SmartAction.ai Aug 2021–Jul 2022 · Full-time

- Designed AI-powered voice assistants for healthcare and retail clients; developed NLU models and reusable conversation-design systems across client accounts.

Jr Conversation Designer | Freshriver.ai Mar 2021–Aug 2021 · Internship

- Designed dialogue and conversational personas for a contactless higher-education enrollment assistant in collaboration with product and engineering.

SKILLS

Design: Figma · Interaction design · Design systems · Component-driven UI · Rapid prototyping · Responsive design · Accessibility

Research & evaluation: Transcript analysis · Usability testing · Data-informed decisions · LLM batch testing · Deterministic checks · Failure analysis

Generative & agentic AI: Prompt design and optimization · LLM orchestration · Multi-step agentic dialogues · RAG · Claude · Codex

Engineering: React Native · Expo · TypeScript · Next.js · Node.js · NativeWind · Firebase / Cloud Functions · REST APIs · Git · HTML/CSS

Collaboration: End-to-end ownership · Cross-functional leadership · 0-to-1 product development · Experimentation and iteration

EDUCATION & CERTIFICATIONS

B.A., Interdisciplinary Studies; Minor in ESL | University of Texas at San Antonio

UX/UI Certificate | University of Texas at San Antonio

Conversation Design Certificate · AI Trainer Certificate | Conversation Design Institute

Cognigy Certified Specialist | NiCE Cognigy
